

November 2025

Expertise France, the French agency for international technical expertise, participates in France's cooperation policy, development aid and economic influence, by responding to the growing demand for expertise from countries to build public policies that respond to their institutional, economic, demographic, social and environmental challenges.

Expertise France supports its partners in the implementation of public policies in the fields of sustainable development, economic development, public finance, governance and human rights, social protection and employment, health, and issues relating to stability, safety and security.

Within the Operations Directorate – Governance Department – Public Transparency, Management and Accountability (TGR) Division.

Expertise France is looking for:

An expert in financial market regulation

Type of contract: Service Provision Contract (independent/ individual expert)
Type of expertise: Short term
Duration: 20 days

Description of the mission

The main mission of the expert will be to support the implementation of activities related to the operationalization of Vietnam's emissions trading system (ETS) in terms of financial regulation.

His/her responsibilities will be as follows:

- Support to the Vietnamese Ministry of Finance for the evaluation of the legislative and regulatory framework relating to the supervision of the emissions trading market within the national ETS that will be implemented from 2026, in coordination with the project team.
- Support to the Vietnamese Ministry of Finance for drafting the legislative and regulatory texts necessary for finalizing the regulatory framework related to the emissions trading market, in coordination with the project team.
- Support the international experts of the project team in understanding the Vietnamese ETS legislative and regulatory framework;
- Ensure coordination on the topic of the emissions trading market between the Vietnamese Ministry of Finance and the project team.

Expected deliverables:

Report on the regulatory framework of the financial market related to Vietnam's emissions trading market, including proposals for regulatory texts.

Description of the context and project

The project – Greening of Budgetary and Fiscal Policies in Vietnam Phase 2 – is a capacity-building project in support of the Vietnamese Ministry of Finance aimed at operationalizing the integration of environmental and climate considerations into public budgetary and fiscal policies.

The project is structured around **4 components**:

1. Capacity building for the Vietnamese Ministry of Finance to consolidate the management framework related to **sovereign green bonds** and raise awareness among market participants about green bonds
2. Support for the implementation of Vietnam's Emissions Trading System (ETS)
3. Development of **environmental taxation policies** for environmental protection
4. Support for integrating the results of green finance and carbon pricing into **the long-term path towards carbon neutrality**

The project implementation period is 18 months, until May 2027, and is funded by the French Development Agency.

The project team consists of:

- 1 project coordinator, based in Paris at Expertise France headquarters, supported by the Expertise France office in Hanoi
- 5 international experts
- 1 local coordinator
- local experts
